

bits per high-radix digit (2) :

α (3) :

β (3) :

B^+ (3) :

B^- (0) :

n^x (3) :

n^p (4) :

Out[183]=

Single Precision	Double Precision	Quadruple Precision
------------------	------------------	---------------------

☒ Share SRT table with fused multiplication/division (Yes)

☒ Support a carry-save residual (Yes)

☒ Design an unsigned SRT table (Yes)

First selection iteration (4) :

A horizontal slider bar with a vertical handle positioned at approximately 5% of the total length.

Number of interval mappings to be used (0) :

A horizontal slider bar with a vertical handle positioned at approximately 5% of the total length.
